About me

I am a full stack programmer with a passion and enthusiasm for technology.

I like to take a systematic approach, paying attention to every detail, to design practical, efficient, and scalable solutions.

I am passionate about initiating and developing projects that allow me to continue learning and training continuously in the field of programming.

Projects

Android app: My reminders

[App with function to remember things and send notifications based on your geolocation. Available on Amazon AppStore](#)

Technologies: Java · SQLite · OSMDroid · Picasso

Desktop app: Cats

Desktop app for exploring and managing cat adoptions, with image and video uploads, integrated chat, ratings, and adoption process.

Technologies: Java · CSS · MongoDB

CRM

Web-based system for centralizing customer information, statistics, and calendar.

Technologies: PHP · HTML · CSS · JavaScript · MySQL

More projects available in my portfolio

Academic data

Computer Engineering, first year

UNED | September 2024 - July 2025

I learned the basics of programming with a focus on BlueJ and C++. Discrete systems and the fundamentals of automata.

Website design and publication

CESUR formación | September 2023 - December 2023

I trained in HTML and CSS, starting out with web pages.

High school in Ireland

St Pauls Community College | September 2020 - June 2022

I prepared myself to have fluent conversations in English with native speakers.
