About me

I am a full stack programmer with a passion and enthusiasm for technology.

I like to take a systematic approach, paying attention to every detail, to design practical, efficient, and scalable solutions.

I am passionate about initiating and developing projects that allow me to continue learning and training continuously in the field of programming.

Projects

AI API Chrome Extension

Chrome Extension that lets you edit HTML files in real time just by selecting what do you want to change

Technologies: AI, TypeScript, JavaScript, Google
